

An AMS equipment powder-coated metal enclosure is great for housing energizers and adornments. It is weatherproof and can be utilized outside. It has an assessment window for a simple review of the energiser status without opening the box. This box is generally utilized inland because of its powder-covered finish. For seaside use, we suggest aluminium or on the other hand fibreglass enclosures.

FEATURES

- Features of AMS this equipment are, Inspection window for review without opening the entryway
- Wooden electrically secluded support plate for mounting the energizers and frill
